Hintergrund

Lizenzen, die zu einer Nutzung von Geutebrück Software berechtigen, werden für einen dedizierte Hardware aktiviert und sind nur auf dieser nutzbar. D.h. im Falle eines Austausches der Hardware oder Teilen der Hardware kann es nötig sein, die Aktivierungen für dieses System zu widerrufen, sodass die Lizenzen anschließend nach dem Hardware-Austausch erneut aktiviert werden können.

Der Geutebrück Lizenzmanager verfügt über eine LockingID, durch die das System bei der Aktivierung von Lizenzen eindeutig identifiziert wird. Alle Aktivierungen, die für dieses System durchgeführt wurden, lassen sich anhand dieser LockingID im Lizenzportal von Geutebrück auffinden. Weiterhin lassen sich die Aktivierungen auch über die ID eines zugewiesenen Entitlements, in dem die Lizenz enthalten ist, suchen.

- **Das Upgrade-Kit dient der Aufrüstung von WindowsSrv 2022 auf WindowsSrv 2025.**
Das Upgrade-Kit ermöglicht es Ihnen, die neueste GEUTEBRÜCK Videoüberwachungstechnik und Videomanagement-Software einzusetzen.
- **Sichern Sie alle Setups / Passwörter / Datenbanken (alle Daten) Ihres Systems! (Windows, G-Sim, G-Core,).** Für eventuell resultierende Kosten für eine erneute Parametrierung des Systems in der Kundenanwendung wird keine Haftung seitens GEUTEBRÜCK übernommen.
- **Nach dem Upgrade muss der WindowsSrv 2022 Aufkleber entfernt und der neue WindowsSrv 2025 Lizenzaufkleber am Gerät angebracht werden.**
- **Achtung:** Nach Austausch des Betriebssystems/M2, muss dieses Online (Internet) aktiviert werden. Dies funktioniert nicht automatisch, es muss der Prod.Key eingegeben werden und in den Systemeinstellungen kontrolliert werden.

Allgemeine Hinweise und Sicherheit

Bestimmungsgemäßer Gebrauch

Warnung vor elektrischer Energie!

Es besteht Lebensgefahr! Beachten Sie, dass Arbeiten an elektrischen Einrichtungen nur von Elektrofachkräften vorgenommen werden dürfen.

Achtung!

ESD-gefährdete Bauteile

Handhabungsvorschriften beachten!

Warnung vor elektrischer Energie!

Bei Beschädigungen darf mit dem Gerät nicht mehr gearbeitet werden. Gerät vom Netz trennen!

Achtung!

Bei allen Reparatur- und Instandhaltungsarbeiten muss das Gerät vom Netz getrennt werden. Arbeiten an der elektrischen Einrichtung dürfen nur von einer qualifizierten Elektrofachkraft vorgenommen werden.

Es dürfen nur Originalersatzteile verwendet werden. Andernfalls können Unfälle für den Anwender entstehen.

Vorgehensweise

Auswahl – LockingID vs. Entitlement

Grundsätzlich gibt es zwei Wege, diejenigen Lizenzen, die für den Lizenzmanager einer (auszutauschenden) Hardware-Konfiguration aktiviert wurden, im Lizenzportal von Geutebrück aufzufinden, um dort einen Widerruf (Revocation) der Aktivierung(en) vorzunehmen.

Die erste Möglichkeit ist die Suche über die Entitlement ID.

Hierzu wird der Geutebrück Lizenzmanager geöffnet und eine Lizenz ausgeklappt, für die eine Revocation vorgenommen werden soll. Die Entitlement ID kann hier in die Zwischenablage kopiert werden, damit sie anschließend zur Suche im Lizenzportal von Geutebrück eingefügt werden kann.

GEUTEBRÜCK License Management Deutsch ▾

Name	Verwendet	Insgesamt	Ablaufdatum des Upgrades
G-Core - Video Management System	1	1	30.01.2026

Menge	Entitlement ID	Aktivierungsdatum	Kunde
1	b044a6ba-b9f5-4db9-8781-a41f00329500	29.01.2025	GB Customer MVK

Upgrade permission: 1 years until 30.01.2026

Der Weg über die Entitlement ID bietet sich an, wenn ein Lizenzmanager nur Lizenzen sehr weniger – bestenfalls nur eines – Entitlements beherbergt.

Wenn die Revocation für ein komplettes System – und nicht nur für einzelne Lizenzen – durchgeführt werden muss, empfiehlt es sich, anstelle der Entitlement ID die Locking ID zur Suche im Lizenzportal zu verwenden.

Upgrade permission: 1 years until 30.01.2026

Der Vorteil einer Suche über die LockingID ist, dass eine Suche über diesen Weg im Lizenzportal zu einem Überblick über alle Aktivierungen, die für diesen Lizenzmanager vorgenommen wurden, führt – unabhängig davon, aus wie vielen und welchen Entitlements Lizenzen auf diesem System aktiviert wurden.

Kopieren der LockingID aus dem Lizenzmanager

Um für ein System eine Revocation anzustoßen, kann man zunächst die LockingID des Lizenzmanagers kopieren, um damit im Lizenzportal nach den aktivierten Lizenzen zu suchen.

Background

Licenses that authorize the use of Geutebrück software are activated for a specific piece of hardware and can only be used on that hardware. This means that if the hardware or parts of the hardware are replaced, it may be necessary to revoke the activations for that system so that the licenses can be reactivated after the hardware has been replaced.

The Geutebrück License Manager has a LockingID that uniquely identifies the system when licenses are activated. All activations performed for this system can be found in the Geutebrück license portal using this LockingID. Activations can also be searched for using the ID of an assigned entitlement that contains the license.

- **The upgrade kit is designed to upgrade from WindowsSrv 2022 to WindowsSrv 2025.**
The upgrade kit allows you to use the latest GEUTEBRÜCK video surveillance technology and video management software.
- **Secure all setups** / passwords / databases (all data) of your system! (Windows, G-Sim, G-Core,).
GEUTEBRÜCK does not assume any liability for any costs resulting from re-parameterization of the system in the customer application.
- **After the upgrade, the WindowsSrv 2022 sticker must be removed and the new WindowsSrv 2025 license sticker must be affixed to the device.**
- Note: After replacing the operating system/M2, it must be activated online (via the Internet). This does not happen automatically; the product key must be entered and verified in the system settings.

General information and security

Intended use

Warning: electrical energy!

Es besteht Lebensgefahr! Beachten Sie, dass Arbeiten an elektrischen Einrichtungen nur von Elektrofachkräften vorgenommen werden dürfen.

Caution!

ESD-sensitive components

Observe handling instructions!

Warning: electrical energy!

If damaged, the device must no longer be used. Disconnect the device from the power supply!

Caution!

The device must be disconnected from the power supply before carrying out any repair or maintenance work. Work on the electrical equipment may only be carried out by a qualified electrician. Only original spare parts may be used. Failure to do so may result in accidents for the user.

Procedure

Selection – LockingID vs. Entitlement

There are basically two ways to find the licenses that have been activated for the license manager of a (replacement) hardware configuration in the Geutebrück license portal in order to revoke the activation(s) there.

The first option is to search using the entitlement ID.

To do this, open the Geutebrück license manager and expand a license for which you want to revoke the activation. The Entitlement ID can be copied to the clipboard here so that it can then be pasted into the Geutebrück license portal for searching.

i Upgrade permission: 1 years until 30.01.2026

The Entitlement ID is a good option if a license manager only contains licenses for very few entitlements – ideally only one.

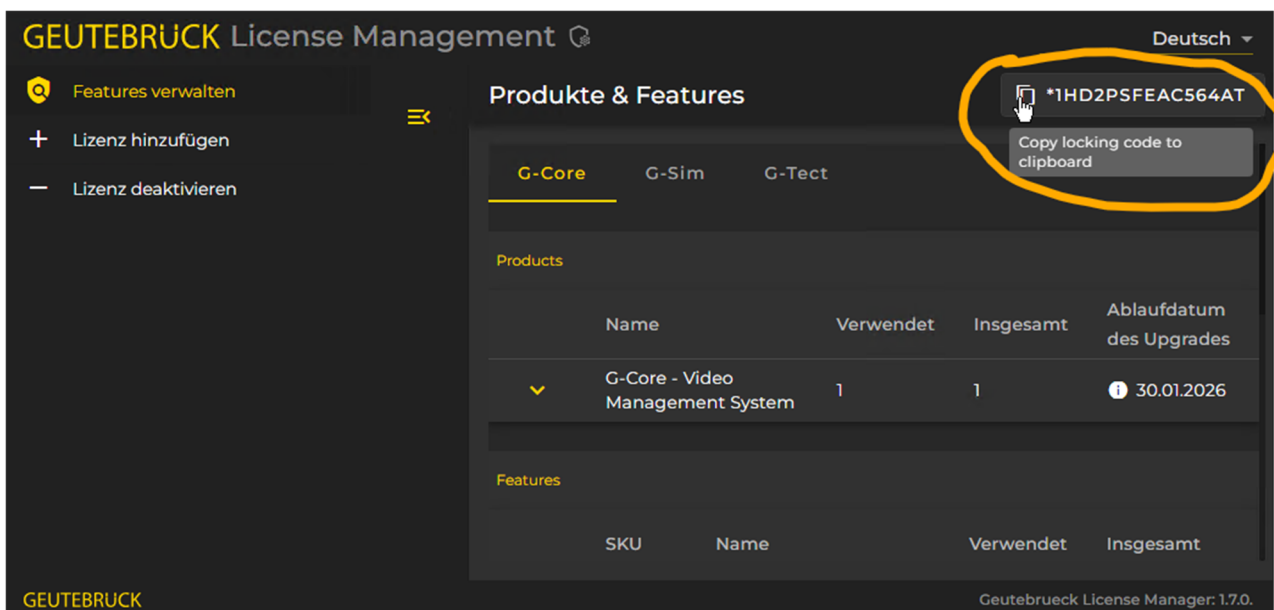

If the revocation must be carried out for an entire system – and not just for individual licenses – it is recommended to use the Locking ID instead of the Entitlement ID to search in the license portal.

The advantage of searching using the Locking ID is that this method provides an overview of all activations made for this license manager in the license portal, regardless of how many and which entitlements licenses have been activated on this system.

Copying the Locking ID from the license manager

To initiate a revocation for a system, you can first copy the Locking ID of the license manager to search for the activated licenses in the license portal.

Find activations in the license portal

 Terminer la révocation dans le portail des licences8

Contexte

Les licences autorisant l'utilisation des logiciels Geutebrück sont activées pour un matériel spécifique et ne peuvent être utilisées que sur ce matériel. Cela signifie que si le matériel ou des parties du matériel sont remplacés, il peut être nécessaire de révoquer les activations pour ce système afin que les licences puissent être réactivées après le remplacement du matériel.

Le gestionnaire de licences Geutebrück dispose d'un identifiant de verrouillage (LockingID) qui identifie de manière unique le système lors de l'activation des licences. Toutes les activations effectuées pour ce système peuvent être trouvées dans le portail de licences Geutebrück à l'aide de cet identifiant de verrouillage. Les activations peuvent également être recherchées à l'aide de l'identifiant d'un droit attribué qui contient la licence.

- **Le kit de mise à niveau permet de passer de WindowsSrv 2022 à WindowsSrv 2025.**
Le kit de mise à niveau vous permet d'utiliser la dernière technologie de vidéosurveillance et le dernier logiciel de gestion vidéo de GEUTEBRÜCK.
- **Sécurisez toutes les configurations** / mots de passe / bases de données (toutes les données) de votre système !(Windows, G-Sim, G-Core,). GEUTEBRÜCK décline toute responsabilité pour les coûts résultant d'un reparamétrage du système dans l'application du client.
- **Une fois la mise à niveau effectuée, l'autocollant WindowsSrv 2022 doit être retiré et le nouvel autocollant de licence WindowsSrv 2025 doit être apposé sur l'appareil.**
- **Attention :** après le remplacement du système d'exploitation/M2, celui-ci doit être activé en ligne (via Internet). Cette activation ne se fait pas automatiquement ; vous devez saisir la clé de produit et vérifier qu'elle a bien été prise en compte dans les paramètres système.

Informations générales et sécurité

Utilisation prévue

Avertissement : énergie électrique !

Il y a danger de mort ! Veuillez noter que les travaux sur les installations électriques ne doivent être effectués que par des électriciens qualifiés.

Attention !

Composants sensibles aux décharges électrostatiques

Respectez les consignes de manipulation !

Avertissement : énergie électrique !

En cas de dommage, l'appareil ne doit plus être utilisé. Débranchez l'appareil de l'alimentation électrique !

Attention !

L'appareil doit être débranché de l'alimentation électrique avant toute réparation ou maintenance. Les travaux sur l'équipement électrique ne doivent être effectués que par un électricien qualifié. Seules des pièces de rechange d'origine peuvent être utilisées. Le non-respect de cette consigne peut entraîner des accidents pour l'utilisateur.

Procédure

Sélection – LockingID ou licence d'utilisation ()

Il existe essentiellement deux façons de trouver les licences qui ont été activées pour le gestionnaire de licences d'une configuration matérielle (de remplacement) dans le portail de licences Geutebrück afin d'y révoquer l'activation ou les activations.

La première option consiste à effectuer une recherche à l'aide de l'ID d'autorisation.

Pour ce faire, ouvrez le gestionnaire de licences Geutebrück et développez la licence dont vous souhaitez révoquer l'activation. L'ID d'autorisation peut être copié dans le presse-papiers afin d'être collé dans le portail de licences Geutebrück pour la recherche.

GEUTEBRÜCK License Management Deutsch

Produkte & Features *1HD2PSFEAC564AT

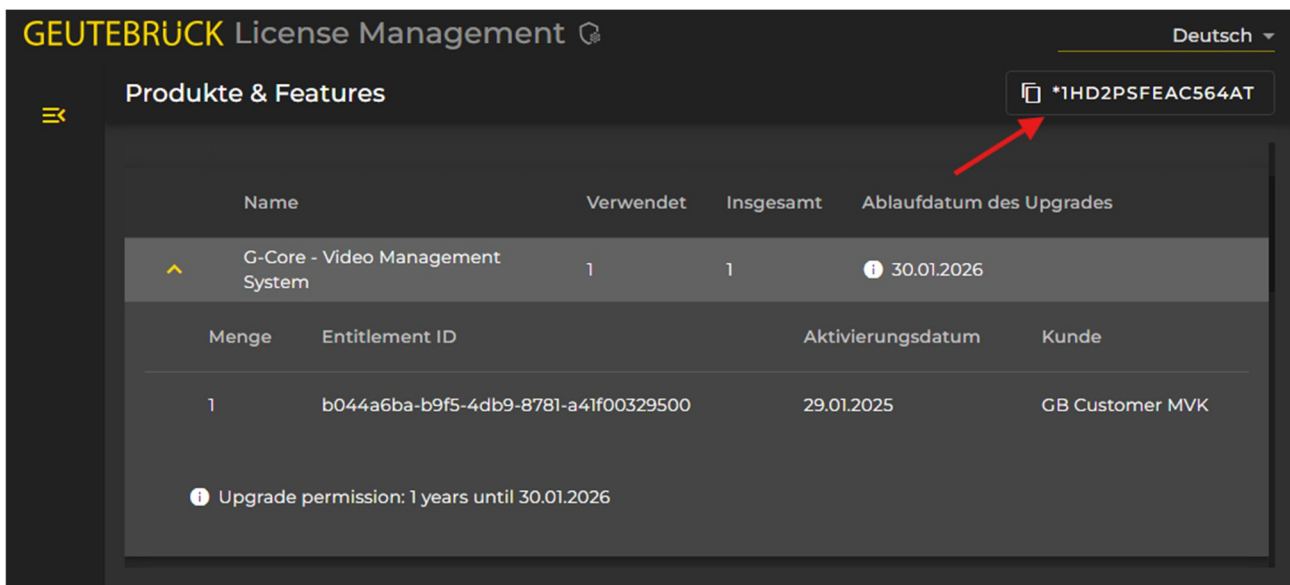

Name	Verwendet	Insgesamt	Ablaufdatum des Upgrades
G-Core - Video Management System	1	1	30.01.2026

Menge	Entitlement ID	Aktivierungsdatum	Kunde
1	b044a6ba-b9f5-4db9-8781-a41f00329500	29.01.2025	GB Customer MVK

Upgrade permission: 1 years until 30.01.2026

L'ID de droit est une bonne option si un gestionnaire de licences ne contient que très peu de licences, idéalement une seule.

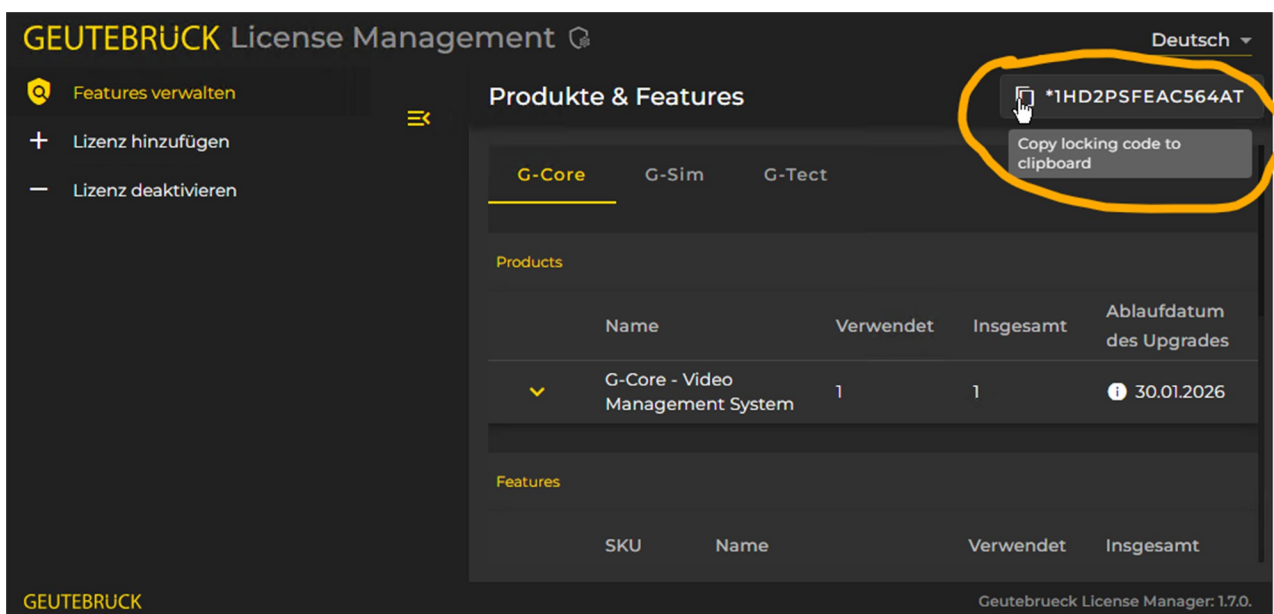

Si la révocation doit être effectuée pour l'ensemble d'un système, et non pour des licences individuelles, il est recommandé d'utiliser l'ID de verrouillage à la place de l'ID de droit pour effectuer la recherche dans le portail de licences.

L'avantage de la recherche à l'aide de l'ID de verrouillage est que cette méthode fournit une vue d'ensemble de toutes les activations effectuées pour ce gestionnaire de licences dans le portail de licences, quel que soit le nombre et le type de licences activées sur ce système.

Copier l'ID de verrouillage à partir du gestionnaire de licences

Pour lancer une révocation pour un système, vous pouvez d'abord copier l'ID de verrouillage du gestionnaire de licences afin de rechercher les licences activées dans le portail de licences.

 Generar ticket de permiso6

 Revocar licencia(s) en el Administrador de licencias7

 Completar la revocación en el portal de licencias8

Antecedentes

Las licencias que autorizan el uso del software de Geutebrück se activan para un hardware específico y solo pueden utilizarse en ese hardware. Esto significa que, si se sustituye el hardware o alguna de sus piezas, puede ser necesario revocar las activaciones de ese sistema para que las licencias puedan reactivarse una vez sustituido el hardware.

El Gestor de licencias de Geutebrück tiene un LockingID que identifica de forma única el sistema cuando se activan las licencias. Todas las activaciones realizadas para este sistema se pueden encontrar en el portal de licencias de Geutebrück utilizando este LockingID. Las activaciones también se pueden buscar utilizando el ID de un derecho asignado que contenga la licencia.

- **El kit de actualización sirve para actualizar de WindowsSrv 2022 a WindowsSrv 2025.**
El kit de actualización le permite utilizar la última tecnología de videovigilancia y el software de gestión de vídeo de GEUTEBRÜCK.
- **¡Asegure todas las configuraciones,** contraseñas y bases de datos (todos los datos) de su sistema! (Windows, G-SIM, G-Core,). GEUTEBRÜCK no asume ninguna responsabilidad por los costes derivados de la reparametrización del sistema en la aplicación del cliente.
- **Tras la actualización, deberá retirar la etiqueta de WindowsSrv 2022 y colocar la nueva etiqueta de licencia de WindowsSrv 2025 en el dispositivo.**
- **Atención:** tras sustituir el sistema operativo/M2, deberá activarse en línea (a través de Internet). Este proceso no se realiza de forma automática; deberá introducir la clave de producto (Prod.Key) y comprobarla en la configuración del sistema.

Información general y seguridad

Uso previsto

Advertencia: ¡energía eléctrica!

¡Peligro de muerte! Tenga en cuenta que los trabajos en instalaciones eléctricas solo deben ser realizados por electricistas cualificados.

Precaución

Componentes sensibles a descargas electrostáticas

¡Respetar las instrucciones de manipulación!

Advertencia: ¡energía eléctrica!

Si el dispositivo está dañado, no debe utilizarse. Desconecte el dispositivo de la fuente de alimentación.

¡Precaución!

El dispositivo debe desconectarse de la fuente de alimentación antes de realizar cualquier trabajo de reparación o mantenimiento. Los trabajos en el equipo eléctrico solo deben ser realizados por un electricista cualificado. Solo se deben utilizar piezas de repuesto originales.

El incumplimiento de estas instrucciones puede provocar accidentes para el usuario.

Procedimiento

Selección: ID de bloqueo frente a autorización de

Básicamente, hay dos formas de encontrar las licencias que se han activado para el gestor de licencias de una configuración de hardware (de sustitución) en el portal de licencias de Geutebrück con el fin de revocar la activación o activaciones allí.

La primera opción es buscar utilizando el ID de autorización.

Para ello, abra el gestor de licencias de Geutebrück y amplíe la licencia cuya activación desea revocar. Aquí puede copiar el ID de derecho en el portapapeles para poder pegarlo posteriormente en el portal de licencias de Geutebrück y realizar la búsqueda.

The screenshot shows the 'GEUTEBRÜCK License Management' web interface. The language is set to 'Deutsch'. The main section is titled 'Produkte & Features'. A search bar at the top right contains the license key '*1HD2PSFEAC564AT'. Below this is a table with the following columns: 'Name', 'Verwendet', 'Insgesamt', and 'Ablaufdatum des Upgrades'. The table lists one product: 'G-Core - Video Management System'. Below this table is another table with columns: 'Menge', 'Entitlement ID', 'Aktivierungsdatum', and 'Kunde'. The 'Entitlement ID' column contains the value 'b044a6ba-b9f5-4db9-8781-a41f00329500', which is highlighted with a mouse cursor. The 'Aktivierungsdatum' is '29.01.2025' and the 'Kunde' is 'GB Customer MVK'. At the bottom, there is a note: 'Upgrade permission: 1 years until 30.01.2026'.

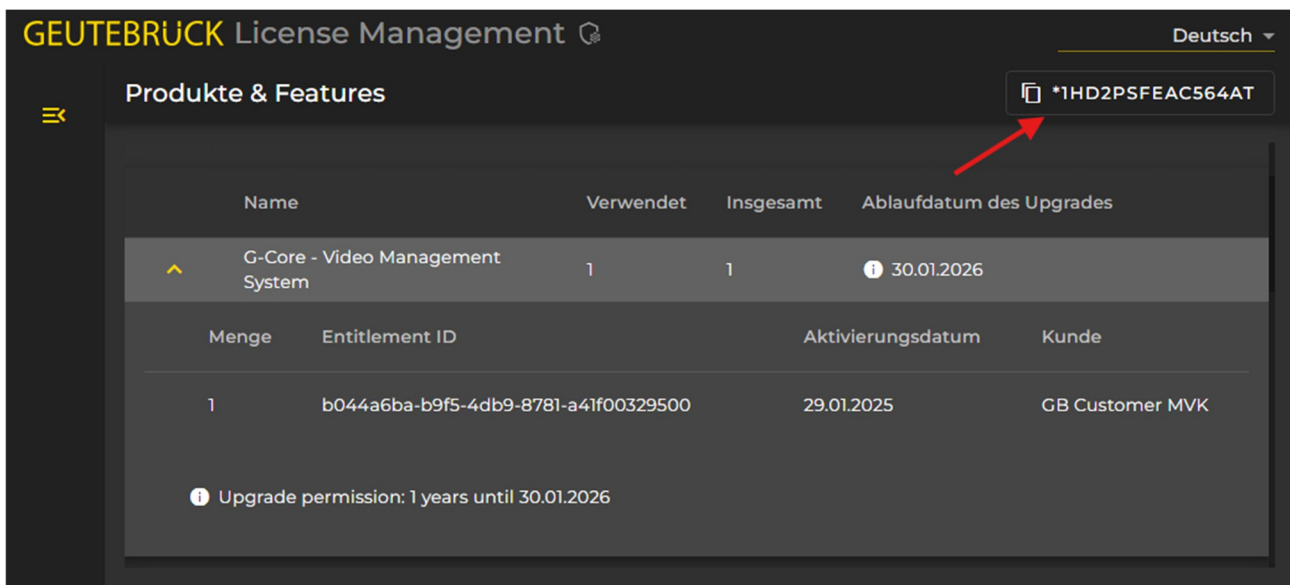

Name	Verwendet	Insgesamt	Ablaufdatum des Upgrades
G-Core - Video Management System	1	1	30.01.2026

Menge	Entitlement ID	Aktivierungsdatum	Kunde
1	b044a6ba-b9f5-4db9-8781-a41f00329500	29.01.2025	GB Customer MVK

Upgrade permission: 1 years until 30.01.2026

El ID de derecho es una buena opción si un gestor de licencias solo contiene licencias para muy pocos derechos, idealmente solo uno.

Si la revocación debe realizarse para todo un sistema, y no solo para licencias individuales, se recomienda utilizar el ID de bloqueo en lugar del ID de derecho para buscar en el portal de licencias.

La ventaja de realizar la búsqueda mediante el ID de bloqueo es que este método ofrece una visión general de todas las activaciones realizadas para este administrador de licencias en el portal de licencias, independientemente del número y tipo de licencias que se hayan activado en este sistema.

Copiar el ID de bloqueo del administrador de e es de licencia

Para iniciar una revocación para un sistema, primero puede copiar el ID de bloqueo del administrador de licencias para buscar las licencias activadas en el portal de licencias.
