

Axis Body Cam Integration G-Core AxisBodyCamIntegration

The Axis BWC Connector pushes video and audio from an Axis Body Cam into the G-Core database. This opens up the possibility to view and search for this footage in G-View or synchronize it along a timeline with video footage from other mobile devices or additional sources as for example fixed cameras.

- Law Enforcement / Criminal Investigation
- Public Transport
- Airports
- Train Stations
- Shopping centers
- Retail
- Industrial Enterprises
- Maintenance Workers
- Entertainment-Events
- Amusement Parks
- Museums/Exhibitions

- Easy and seamless back-office management of BWC footage into G-Core database
