

## Hardware platform for mobile applications

### G-ST 500+G3/4R

The hardware platform is designed for mobile use and guarantees optimal interaction with Geutebrück software. The certified construction can be used in vehicles of all kinds and can also be connected via wireless transmission (WLAN, mobile radio). Due to the special design, the hardware is passively cooled and requires no active cooling. The device has four network ports (PoE+). Please note: The parameterization of the system determines the required hardware resources.

- Monitoring of train wagons or sea containers.
- Installation in government vehicles or buses for complete documentation.
- Forklift trucks for optimum monitoring of processes.

- Simple installation in or on vehicles due to compact and easy design.
- Direct on-board operation through low-voltage power supply.
- Installed PoE Ethernet ports for direct connection of IP cameras (4 x RJ-45 connectors).
- Wide temperature range from -25° C - 70° C.
- Additional modules (LTE, WIFI & GPS) enable wireless access to video streams and location of the current location.
- Due to passive cooling of the device, no external cooling is necessary.
- Perfectly adapted to the requirements of video surveillance (CCTV).
